

Female Adapter with Brass Threading

HDPE Female Adapter with Brass Threading – Prime Quality for Secure, Durable Connections

The Prime HDPE Female Adapter with Brass Threading is designed to provide reliable and durable connections between HDPE pipes and threaded fittings. Made from high-quality High-Density Polyethylene (HDPE) with a brass threaded insert, this adapter is available in sizes ranging from 20mmx1/2 inch to 90mmx3 inch and Standard Dimension Ratio (SDR) of SDR11, ensuring compatibility with various pressure and application needs. The combination of HDPE and brass offers superior strength, corrosion resistance, and long-lasting performance, making it ideal for use in water, gas, and industrial systems. Trust Prime for easy installation and leak-free connections across a wide range of applications.

SDR 11
