

YEE 45°

HDPE YEE 45° SDR11 & SDR17 – Precision & Performance by PRIME

PRIME's HDPE YEE 45° fittings, available in SDR11 and SDR17, are engineered for superior performance in high-demand piping systems. Manufactured with premium-grade high-density polyethylene (HDPE), these fittings offer exceptional strength, flexibility, and corrosion resistance, ensuring long-lasting reliability in water distribution, irrigation, firefighting, and industrial applications. Designed for seamless integration, PRIME's HDPE YEE 45° fittings facilitate smooth flow transitions, reducing pressure loss and enhancing system efficiency. Whether for high-pressure or standard-duty applications, PRIME delivers precision-engineered solutions that meet international standards, making them the trusted choice for modern infrastructure projects.
