

Electrofusion Elbow 90°

Prime's Molded Electrofusion HDPE 90° Elbow: Durable and Efficient Connections

Prime's Molded Electrofusion HDPE 90° Elbow ensures precise, leak-proof directional changes in HDPE piping systems. Made from high-grade HDPE, it offers superior chemical resistance and long-lasting performance. Designed for easy electrofusion joining, this elbow provides a permanent, robust connection, ideal for water, gas, and industrial applications. Compliant with ISO and ASTM standards, Prime delivers reliable, low-maintenance solutions for your piping needs.
