

Electrofusion Stub Flange adaptor

Introducing the HDPE Electrofusion Stub Flange SDR11 from PRIME, where cutting-edge design meets unmatched durability. Our stub flange is expertly engineered for secure, leak-free connections in HDPE piping systems, ensuring optimal performance across a variety of applications. Utilizing advanced electrofusion technology, the SDR11 stub flange provides a seamless bond that withstands high pressures and harsh conditions. Easy to install and compatible with various pipe sizes, it's the perfect solution for both new installations and system upgrades. Trust PRIME to deliver exceptional quality and reliability—experience the difference with our HDPE electrofusion stub flange and elevate your piping projects to new heights!
