

Electrofusion Tapping Saddle

Introducing the HDPE Electrofusion Tapping Saddle SDR11 from PRIME, the industry leader in innovative piping solutions. Engineered for durability and reliability, our tapping saddle is designed to provide seamless connections in demanding applications. Crafted from high-density polyethylene (HDPE), this product ensures excellent resistance to corrosion and chemical exposure, making it ideal for water and gas distribution systems. With its SDR11 rating, the tapping saddle guarantees optimal pressure management, enhancing the overall performance of your piping network. Trust PRIME to deliver superior quality and efficiency, ensuring your projects run smoothly and effectively. Upgrade your infrastructure today with our top-of-the-line HDPE Electrofusion Tapping Saddle!
